

THE ANTELOPE INDIANS.—Dr. In-
skeep informs us that he can call to
mind fourteen men who have been shot
at by Indians, in his neighborhood,
within a few months, besides those who
have been murdered. Nine guns and
three pistols have been stolen within
the same time, besides ammunition, and
a large amount of other property. The
people of the neighborhood are said to
be in constant fear. The petition to
the Legislature, for assistance, is being
numerously signed.
