

The Indian Excitement

We understand that the meeting of Ranchmen and others held at Corum's Ranch, on Sunday last resulted in a determination to make one more peaceable effort to put an end to the present Indian disturbances in this neighborhood. A petition was hastily drawn up and signed by some thirty-five or forty persons and forwarded to Col. Henly, Indian agent, asking that some decisive measures should be immediately taken to repress the Indian outrages. Letters accompanied the petition stating more fully than that instrument, the particulars of the grievances, and intimating in a manner, not to be misunderstood that, unless the complaint was attended to forthwith by the proper officers, the sufferers would be compelled to take the matter into their own hands and protect their persons and property in a manner that American citizens well know how to do, as a last resort. We understand that Col. Henly is now in the Mountains, above, and will be in this place in a few days, on his return when we trust he will give his personal attention to the grievances complained of, and, either in person, or through the local agent, Mr. Delano, take such steps as will put an effectual stop to any further aggressions, and, if possible, bring to punishment those who have already offended.

The Subscribers would take this method to re- scribe to their friends and the public generally for past favors, and would respectfully solicit con- tinuance of their patronage. He has now on hand, and stands ready to keep constantly in store, as

The Mineral Wealth of Michigan.
The Detroit Weekly Advertiser gives some very interesting information on this subject—the result of the patient labors of Dr. Houghton and other gentlemen, who have been engaged in developing the riches of that State. Michigan contains coal, and in the neighborhood of Sandstone, two hundred and fifty tons have been raised during the past season. The coal is of good quality, and the working is easy. The beds outcrop for a hundred miles or more on the Grand River, and from more recent discoveries would extend to the Straits of Mackinaw. Quantities have been sold in Jackson county at \$3 per ton, and when some system is employed in the mining, it is expected to be much cheaper. The State is working a shaft by convict labor in the prison of Jackson.
Copper occurs frequently in the upper peninsula, and silver has also been found to a considerable extent. Cannon coal has been discovered in Jackson county which makes a most excellent gas.

The Level of the Great Lakes.
There is said to be a mysterious rise and fall of the level of the great American lakes, which has long occupied the attention of many scientific men. In addition to the variations which depend upon the changes of seasons, there is also a local, equal, irregular oscillation, of a few inches to a few feet, not to be predicted, its period of oscillation being from three to five minutes, and which continues from one to twenty-four hours. In the course of several years' observations no wave has been seen over two feet in height.

Foreign Miner's Tax.
The recent Legislature passed a very stringent amendment to the Foreign Miner's Tax Law, which provides that no person not a citizen of the United States, or who shall not have declared his intentions to become such, shall be allowed to take gold from the mines of this State, or hold a mining claim therein, unless he shall first procure and pay a license therefor.
Any person or company bringing foreigners, or renting, or on shares, or in any manner connected with any foreigner or foreigners, in working, or in possession of any mining ground, shall be held liable for the amount of license of each and every foreigner with whom such person or company is so connected or interested. All mining grounds worked or possessed, all improvements, all tools and machinery used in working such ground by said person or company, shall be subject to sale for the payment of said license tax. The collectors have power to require any person or company believed to be indebted to any such foreigner, to answer under oath as to such indebtedness, or the possession of money, gold dust or other property. In case a party is indebted, he may collect from such party the amount of such license.

A Singular Book has recently been issued from the N. Y. press illustrated by over 500 engravings and explaining over 1000 magnetic tricks, also giving the marvels and curiosities of Chemistry, Magnetism, Electricity, Galvanism, &c. The wonderful operations of traveling Magicians are lucidly and comprehensibly explained, together
