

From the Mountains.

DETACHMENT FROM FORT GASTON.—Since last advices the Command have had an engagement with the Indians, in which one soldier was wounded and eight Indians killed. We are not informed of the particulars of the fight.

LIEUT. COLLINS' COMMAND.—We have the following note from one of the volunteers attached to this Command:

LARRABEE CREEK, JUNE 12th, 1861.

FRIEND WHIPPLE:—I find an opportunity of letting you know the news by the mail carrier, as he stops at our camp tonight. I suppose you have had the news up to the 27th of May, from W. I. Reed, and from his report you do not give us credit, by fourteen, of the amount killed.

May 30th was one of the greatest days in our campaign, from the fact that at one o'clock A. M. we started from our camp with Lieut. Collins at the head of the party, and after traveling until about 6 o'clock A. M. we came in sight of the ranches just as the Indians were going out a hunting. We commenced firing, and after a fight of half an hour we went to counting the dead,—found twenty-five bucks killed and about ten wounded. We found no guns, but got twelve quivers full of arrows which the Indians had made use of very fast. Then comes June 2d and with it another fight, showing evident signs that but few escaped the lead or knife. Men were stationed in all directions. Here we counted twenty-three killed and some wounded, we then burned the ranches and started back to camp very sleepy.

June 8th had another fight killing seven. Some of the boys are out now and I have not heard from them;—will write you next week by the mail or sooner. Lieut. Collins is a man that every body likes, and deserves our thanks for his many acts of courtesy. No more at present, but remain, yours, &c.,

E. E. TURNER.

Top of the Mountains

Car of a Marine. The coop - A
Washington letter says that the
this of the way in which affairs are man-
aged in the Federal Capital.
The way the Government can do work
is curious. As an illustration, you see
your family names in connection of the
the construction of a new camp in your
land. The Government appoints an ar-
chitect of the work, paying \$1,000
or \$2,000 to him to make a plan. Al-
though the work is done in the name of
the Government, the architect is not
get you to appoint my brother-in-law
chief engineer. I am not a son of
brothers, constant expenditures, and
my brother-in-law appoints one of his
brothers assistant engineers - all at your
expense. We pay each first - some
and some and the ground level, drink
for bottles and glass bottles, and the
right made the
Las Vegas, and a
printed report of 13 pages, furnishing
you a complete topographical survey of
your lot. A yard and a most amount of
statistical information with regard to the
number of hens you are likely to have for
the next 20 years - all which up to the
point with this announcement that the site
of the hen-coop has been selected, and a
call for another appropriation to grow
the work, which we assume you will
be done with "rigor." You place \$1,000
or \$2,000 more in bank, and we employ
200 hands at \$3 a day to transport 75
under our management about ten times
that many dollars) to the place of work.
From which requires about three months.
In the meantime, we disburse and bil-
l on vigorously with the horses and bil-
lards. We then come up with another
appropriation, and demand for another ap-
propriation. With this we get the total of
100,000 more in bank, and with one or two
more appropriations, and a great many
more appropriations, we are able to pay
for the work. The architect has the
power to do anything he likes, and the
thing covered by, and at the end of twelve
months, which we very appropriately style
our "fiscal year," we not only in formal
possession of a ten thousand-dollar pen-
