

RETURN OF ANOTHER HONEY LAKE PARTY.—
On Friday, June 28th, Messrs. McCuiston and Payne returned to Oroville from a trip to Honey Lake. Their object was to provide themselves with a stock of goods for the valley. The *North Californian* says:

They give a glowing account of the beauty and fertility of Honey Lake, and the intermediate valleys. They brought us some heads of wheat, the largest and plumpest we have seen. The grain crops are excellent and uninjured by drought, and the hay fields surpass in excellence of quality and luxuriance of growth, anything to be found in the country.

These gentlemen report the road to be the most superior mountain road they ever saw. There is not a hill on the route over which Payne will not undertake to haul 4,500 pounds with his four horse team. The only improvement that is at all necessary to make a first class wagon or stage road, is the removal of the loose rocks, which are very plenty between Chapparal Hill and Humbag Valley. Immigration is gradually centering in the valley. Several families have recently arrived there from Rabbit Creek. On their return they met Mr. Nye, who contemplates taking his large drove of stock to the valley, if he finds it as represented. Letters received from Missouri state that the Honey Lake fever is raging violently among the emigration. Hundreds of them are contemplating making it their home, and many others are intending to winter there and recruit their stock.
