

INDIAN OUTRAGES.—The savages still continue to commit depredations in various quarters. — We hear of their killing stock on every hand, but that has become so common as hardly to excite remark. On the 2d inst., a party attacked the premises of Mr. Cudderback, within three miles of Hydcsyille. Mrs. Cudderback made her escape but was shot at, one bullet grazing her person: Mr. C. and a friend were in a field near the house, were shot at, but not injured. The red devils robbed the house and made their escape in safety. On Monday a party of Indians robbed the house of Donald Morrison, on Fresh Water about six miles from this town. No person was at the house at the time and the rascals had it all their own way. A party of white men followed but were unable to catch any of them.
