

INDIAN DIFFICULTIES.—The Indians on Weecott River have for some time past, been troublesome and threatening;—they have searched men for their money and have threatened and menaced others. A few days ago a party of them attempted violence upon a lady living on the river, which becoming known to the settlers in that vicinity, they collected and proceeded to chastise them. On Wednesday the whites succeeded in killing three warriors. Since that time, rumor has it that fifteen has been killed, which however is not authenticated. We hope some one below will furnish us with the particulars.
