

RED BLUFF.—In the *Beacon*, of July 13th,
we find the following:

We are informed that the Surveyor General has recently surveyed the line between this and Butte county, and contrary to all expectations, and contrary to all justice and fairness, has located it at the northern boundary of Township 23, which deprives us of the very best portion of our taxpaying community.

General Kibbe has been in town several days, laboring under very severe indisposition. We are informed that it is the General's intention to visit the scene of Indian hostilities in the vicinity of Antelope creek, and, if necessary, raise a company of volunteers to chastise the Indians.

A gentleman informed us, a few days since, that Dr. Ruff had disposed of his present year's crop of wheat at three cents per pound to some of the mills in the neighborhood of where he resides, probably the Cow Creek or Battle Creek Mills.
