Fight with the Indland One White Man. -Isiliela-Ten Mules Isiliot and Missing. It is generally known here that three sepa-U rate companies have been hunting Indians for the past twelve days, on Redwood and upper Mad River, in the vicinity of where Ross was shot... One company-under command of John Bell-numbering sixteen men, had been pursuing the Indians very close for several days, and on-I hursday-morning\_they made an at--tack on a rancho, on Grouse, Creek, near-where Ross was shot. They routed the rancho, and killeil quite a number of Indians.-It appears that the Indians had collected there to the number of about oue hundred, with the intention of allacking Boll's party .. They had di vided in two nactics, intending to engage Bell's party before they reached the ranche ria. Bell, however, did not go by the route the Indians expected him to, and was surprised-by the-Indians-in ambush as he returned from-the rancheria, on the way to his camp. Que of Bell's men was shot dead at the first fire. We have not been able to learn any farther particulars than that when Bell reached his camp ho found ten of his mules killed and missing, and his camp entirely broken up He fell back to Tarden's Tranch, which ho reached about daylight yesterday morning. The-whole party were completely worn out with fatigue, and some of them barefoot. They will rounding there till they receive assistance from this place. A party will start out from here this morning. It is thought that the Indians are collected in large numbers in that vicinity and that they intend to stand their ground. They have quite a number of guns, and are prepared to make a desperate resistance. It is hoped that a party will go out from Eel-River and act in conjunction with the men in that section. There is a small company in the vicipity of the Buttes, but they must be well fagged out by this time, hiving been out now for twelve days. When last heard, from they had done good service. ъ., Persons-will liave to be cautions in traveling the trails for the present, though we are inclined to think that all the trouble just now will be on Reil Wooll and upper Mad River.
