

~~Going to Settle.~~ We understand that many of the enlisted men of the Second Regiment, California Volunteers, who have been serving in this District in the war against the Indians, and whose time will soon expire, intend to make this county their permanent home after they shall have been discharged. These men have had an opportunity of informing and satisfying themselves in regard to the advantages which our county possesses, as compared with others in the State, for the purposes of a permanent settlement, and we view their intended action as a highly flattering expression in favor of Humboldt county.
