Columteers for the Indian War. Move-

Last week we gave notice that books would be opened for the chrolling and organization of volunteer companies to operate against the Indians in this section. Steps were taken to supply and equip them for a campaign of four months, but the arrival on Sunday morning of forty-eight recruits, per steamer Columbia, had the effect to check the movement. We on see no reason, however, why the company should not be formed. We have frequently suggested the propriety of organizing a military company in our county, under the militia law of the State. In a county like ours, where we are in the midst of hostile savages. such a step would not only be judicious, but it is absolutely necessary. It would cost nothing to form and draw our arms, and drilling would be but a healthy exercise, and a pleasant recreation. We hope, therefore, that the company may be formed, and an application made for arms forthwith. Then, should there be any occasion, for the services of volunteers, at a word from the Governor the company would be ready to take the field.

The troops now here, which are to go out in a few days after the Indians, are all raw recruits, but they are being drilled and made ready for service, with all possible dispatch. The number of men now at the disposal of the commander of Fort Humboldt, even if they were old soldiers, are insufficient to conduct a successful campaign; but it will be seen by a communication to Gov. Weller, from Head Quarters of the Army, published in another column, that more troops will be sent up as soon as possible.

Major Raines, commander of the garrison here, appears to feel a deep-interest in the

by a communication to Gove Weller, from Hend Quarters of the Army, published in an other column, that more troops will be sent up as soon as possible.

Major Raines, commander of the garrison here, appears to feel a deep interest in the matter, and is using all possible dispatch to get his men rendy for service, and send them out. Capt. Underwood, who is to take command of the expedition, is expected here to-day, and will probably be ready to occupy hostile grounds early the ensuing week. We have every confidence-that Capt. Underwood will-prove an efficient officer in the campaign, being a brave and active young man, with the benefit of considerable experiences in Indian fighting.

In answer to a request of the citizens' Committee of Union and Eureka, that the froops might occupy Pardee & Barney's ranch for a temporary post, Maj. Raines replied that he had anticipated the necessity of establishing a post in that vicinity, and that the request should be complied with:
