

INDIAN RESERVATION MEETING.—We give up considerable space to the proceedings of the meeting held at Eureka, on Tuesday, for the purpose of expressing the sentiments of the people of the county against the absorption of our coast in the Mendocino Reservation. We have heretofore, on several occasions, noticed the outrageous proposition to extend the Northern limit of that Reserve in such a manner as to destroy, as far as white people are concerned, a fine range of stock and agricultural country in the lower part of this county, being covered with improved ranches and herds of stock, and these proceedings show that we are fully-sustained in whatever we have said on the subject. We were not down to the meeting, but learn that it was well attended and that the greatest unanimity of sentiment prevailed. It should, and doubtless will, have weight with the department in permanently fixing the Northern boundary of said Reservation.
