

NOME LACKEE RESERVATION.—Col. Hen-
ley Indian Agent for California, who left the
Reservation in Colusa County a few days
since, furnishes the Union with the subjoined
items:

There are now fifteen hundred Indians on
the Reservation which is superintended over
by Mr. Lovell, the Deputy Agent, Mr. Ford
having gone over to the Coast. Everything
denotes business, activity and industry about
the grounds, the Indians being assidu-
ously engaged in hauling hay, sowing wheat,
building houses, and preparing for the rainy
season. The health of the Indians is good,
and they appear contented and happy in their
civilized home.

GRASS VALLEY, CALIFORNIA, TUESDAY, NOVEMBER 20, 1855

stage a company near Jamestown some five miles from Sonora, the Messrs. Oliver, Lyons & Co, after two years faithful labor in the cutting a tunnel, only a few weeks ago reached the object of their search. This tunnel is eleven hundred feet in length, and cost over sixty dollars per foot. It is mostly through solid rock, and at one section, by the most arduous labor, they were enabled to advance but six inches during three weeks time. This is an instance of confidence, perseverance and patience, almost unparalleled in the mines.

Physician and Surgeon, L. J. CZAPKAY. His method of curing diseases is new, unknown to others, and hence the great success. All consultations, by letter or otherwise, free. Address, L. J. CZAPKAY, M. D., San Francisco, California, that!

The Aspect of the War.
 The Irish people through their organ, the "Dublin Nation," then speaks of the present aspect of the war in the Crimea. The news of the recent "victory" which has cost the lives of so much blood, robbed it of its military prestige, increased, to an alarming extent, the huge public debt and literally made England a nation of orphans. It terminated up as follows:

"The great victory" at Sebastopol has at length admitted what was but credible of truth, and let it fairly be said that the nation vanishes with unexampled rapidity. The map of blood-stained Africa for the past year, they remember that which the Russians, especially, long ago had in their hands. They had, and they had, a few weeks ago, a salient point, a Gordon, for all the blood and gold squandered during that terrible siege. France, England, and Italy, in this case for such magnificent results—she, who can scarcely advance a legitimate claim to participate in the feeble ray of glory won by the bravery of France! "Our august Ally," indeed, despatches a special message of congratulation to the brave British army—recognizes the "moral force" by which they have been habitually distinguished; but the independent journals of France, who have no occasion to conceal their contempt for the dour general and boy-soldiers who have been a curse and impediment at every point of the campaign. Mark the intense scorn with which the "Assemblée Nationale," for example describes the part taken by the British contingents in the recent assault: "The English attacked the Redan, but all their efforts failed before the artillery of the enemy, and they were not able to become masters of it. This time, at least the failure of their attack did not endanger the..."

with which we could pick up sesales of gold of the value of from twenty-five cents to three dollars. The gold is of the same quality as that found in river beds, and all concur in the belief that the lead occupies the bed of an ancient river. Dr. Somers, of the Columbia Company, has two shafts in operation, and another in progress. He is taking out dirt, the estimated value of which is two ounces to the cart load.

Huge piles of this dirt are being heaped up in every direction of the "digging." That of Valentine & Co. is valued at \$9,000; Johnson & Co.'s, \$25,000; Sampson & Co.'s, \$35,000; Caldwell's, \$75,000, and so on, through numberless artificial mountains of the precious ore. Water is all that is wanted to separate the pure metal from the dry "dross," and when the rain shall come we may all feel the benefit of its long prayed for advent [Sonora Democrat].

The Sonora Herald is informed that there is hardly a foot of Table Mountain, from
