

HUMBOLDT HOME GUARDS.—We have no intelligence from the volunteers since last week, the high water rendering communication impracticable. As the time for which they were mustered into the service of the State will expire on Monday, it is probable they will be in soon, though they will not be particular as to time, if there is a show for another brush with the Indians.

It is not expected that Governor Downey will authorize another term of service, as General Wright evinces a willingness to furnish troops in sufficient numbers to give protection to our citizens.
