

THE KERN RIVER HUMBUG.—A gentleman who came down from the Tejon a few days since, states that there is no mistake as to the discovery of gold on Kern River. He says there are several hundred men on the ground, and many more arriving. Some of the Indians have left the Reservation for that region. Kern River is about forty miles from the Tejon, and the gold region is reported to extend more than a hundred miles towards Owen's Lake. The Indians are represented as hostile to the miners, and much precaution is necessary to guard against them.—*Ib.*

NEWS FROM EL CHINO.—We received news from Chino yesterday, that the Indians were again committing depredations on the ranches in that vicinity.

Col. Williams is well convinced that these Indians belong to the Tulare and Four Creek tribes, and have been on the Reservation at the Tejon. Some of the Rancheros have lost nearly all their stock of horses, a number of them having been killed with arrows, and the balance driven away through a pass into the Tejon. We understand that Lieutenant Beale has released many of these Indians from their employment at the Tejon, that they might take a "*passar*" into the mountains, and have some relaxation from the toils of their harvest. If this is the fact, and these miserable beings are left to roam hither and thither wherever they like, (after being quartered in our immediate vicinity, pampered, clothed and fed by Government,) we shall always be liable to their incursions at certain seasons of the year. Lieutenant Beale has been sanguine of complete success in the measures he has taken to civilize these Indians, and we wish not to condemn this new policy of our Government of making Indian Reservations within the limits of organized States, until it has had a fair trial.—*Ib.*

SUSPENSION OF THE SAN DIEGO HERALD.—We learn by a person direct from San Diego, that the *Herald* is suspended on account of the illness of its worthy editor, and that the jorns have left the office in disgust.—*Ib.*

DISTINGUISHED MUSICAL ARRIVAL.—In the list of passengers by the *Sea Bird*, from San Pedro yesterday, we notice the name of Organ Grinder, Esq. This distinguished and well known musical artiste has been on a professional tour through the southern section of the country, where he has charmed large audiences with the delicious strains of "Mary Blane," "Oh Susanna," and "Katy Darling." We understand that this distinguished artiste will not appear at any of our theatres, but will give his performances on the streets, for the benefit of the public generally.

DEDICATION OF THE NEW PRESBYTERIAN CHURCH.—
