

The same evening that Clifford was killed, another assassination was attempted, which the *Star* says, that a man came running into the Bella Union Hotel, the very picture of fright, and fully convincing many of the bystanders that he was crazy, declared that he had been cut, shot at, and narrowly escaped with his life, from the attack of a couple of villains with whom he had started to go down to the lower end of town, to attend a dance. Upon examination, two wounds were discovered upon him, one upon the left arm and the other in the back, neither of which were very serious, but looked as if the person who had inflicted them must have had some intent to take life. The gentleman's name is Abram Sharp. He arrived here upon the *Southerner*, on Friday last. The same evening, at the request of a couple of persons, whose acquaintance he had formed on board the steamer, one a Mexican and the other Albert Bryant, of San Jose, went to take a walk below town. It was during his absence that the attempt was made upon his life. He had upon his person at the time of the assault, about fifteen hundred dollars, and in the squabble, or during his flight, he lost some two hundred of it.

An old man named Isaac Slover, was killed by a bear near the Cajon Pass. He has been a resident of that part of the country since 1843, and was 80 years of age.

FROM THE TEJON.—Col. Beall arrived in town yesterday evening, from the Tejon, and informs us that matters at the Indian Reservation are in a sad condition; that the Indians are leaving for their homes in the mountains and on the plains, and that the person in charge during Col. Henley's absence, has no control over the wild spirits that are around him, but the supplies and grain are being wasted in a shameful manner.—*Star*.

GOLD DISCOVERIES IN LOWER CALIFORNIA.—Don Juan Ramirez has just returned from a visit to Lower California, and has furnished us with the following items of news:

Gold has been discovered in large quantities in a place named Los Maritos; these placers were abandoned for want of water, but as soon as the rainy season sets in, they intend to recommence digging. In the valley of San Rafael, it was reported that an Indian found gold on the surface, and that he had brought in near a pound to San Rafael. If the discoveries of gold prove true, Lower California may hope for better things in future.—*Ib*.
