Reports the results of  
his investigation of  
the affairs of the  
Great Island Co-  
operative, the em-  
ployment of superin-  
tendence and employees  
at the same, the a-  
mount of money that  
will be needed to place  
them in working condition  
— Enclosed tracings of the  
property belonging to the  
Great Island Co-operative  
Cooperative, statement  
of the indebtedness of the  
Company to the Bank, house of  
employment, employees of  
the Company, and all other  
matters connected with the  
condition of the Co-  
operative.

Very truly yours,  
John A. Dietrich

Rio Bluff Nov 22<sup>nd</sup> 1860

Hon. A B Greenwood Commissioner of Indian Affairs  
Sir

I forward you in separate Envelopes  
Inventory, of the property belonging to the Muncino and  
Klamath Indian Reservations, It will be perceived that  
over one half of the value of the property consists in the  
product of the soil, reference to the Inventory will show  
the condition of the property, I found on the south end  
of the the Muncino Reserve, <sup>and</sup> at the mouth of the Noyo  
River, the establishment of an extensive Steam Saw Mill,  
in close proximity to the head quarters and, the principal Indian  
farming, detrimental in my opinion to the best interests of  
the Reservation, materially damaging the fishing, a chief  
source of Indian subsistence, by keeping the stream constantly  
full of drift wood, besides productive of many other evils  
that might be mentioned, there are also two stores on the  
Reserve how permission was obtained I know not either  
for making or selling goods on an Indian Reservation —  
There are on this Reserve about two thousand Indians  
and produce enough if used with economy to sustain them

but no Beef and but a limited quantity of fish - The farming implements are all nearly worn out and new ones must be procured, and, of Clothing the Indians are actually destitute, Blankets Panty and Shirts, Suds are wanting, such as Carrot root, beagoy and Turnip these cannot be produced here the Climate being too damp they do not perfect, also a change of Oat Barley and Potatoes, the present Crop being of the same seed that was at first introduced on the Reserve less than four Labourers cannot conduct this Reservation properly, nor any other, here there should be at least five and a Blacksmith but, the law makes provision for four only, the farms or stations are from three to ten miles apart <sup>and</sup> are four to expect one man to govern five hundred Indians compell them to work, which must be done for of their own accord they will not work, would be to expect impossibility, an Outlay of three thousand will be required to fit up this Reserve into good working condition, Clothe the Indians and furnish blankets not to all but to the heads of families and the working hands I am informed that they have had no Clothing for the past year, I appointed Capt'n H Smith Supervisor on the 1<sup>st</sup> day of Sept., and with the assistance of Capt. Dillon

who had charge from the time of Mr. Fordy's death, completed  
the inventory of the property on the 3<sup>rd</sup> day of October, on  
the same day I discharged the employees but found it  
necessary for the security of the Crop and other property  
to employ four of them again on the 4<sup>th</sup> of Oct under the  
new law of Congress, The accounts of the employees for Compensation  
were presented to me & certified to their finding upon examination  
of the Labor account and by reference to draft, Dillor and  
others that the services had actually been rendered, there  
are other accounts not yet presented for expenses incurred by  
John Dillor ~~for~~ during the time he was in charge,

as for the sanitary condition of the Indians, I beg leave  
to refer you to a communication entitled to Credit. and,  
herewith transmitted, from Doctor Pinan to Captain  
Smith, since the dismissal of Doctor Ames Doctor  
Pinan out of humanity has attended many of them -  
There is more or less disease at all the Reserves except the  
Klamath whom <sup>from</sup> its isolated locality they see but few whites  
An uncontrollable proof that Indians have better health  
and fare better in every respect, when they are least exposed  
to contact with whites, The plan of letting Indians to  
farmers is not practicable to any extent

Sacramento Valley is the only extensive farming section in my District, all farmers who desire them have long since been working as many as they could profitably employ in some instances they have more and would like to <sup>be</sup> rid of them, at least all such as are not good able bodied workhands and these frequently when taken sick or otherwise disabled, are turned away or sent off to the Reservation, I have had but two applications for Indians since I am in the office —

(Klamath) On visiting the Klamath Reservation I found it in excellent order it has the appearance of a well regulated Plantation the Agent Mr. Buel has done himself much credit by his efficient management of this Reservation, It was turned over to me with all the property on the 31<sup>st</sup> day of October the accounts of the Agent and those of the employees were presented to & certified to them and transmitted them herewith - I appointed George W. Cornell supervisor and employed four of the former employees as I was assured they had all faithfully discharged their respective duties performed to the inventory will show the amount of property and produce, very little is required to continue the Reserve prosperously Clothes Blankets and a few medicines twelve hundred dollars will be ample sufficient for one year

But they do not complain as the fishing on the River supply  
them with an abundance of meat; These Indians are healthy  
well fed well clad peaceable happy and Contented - a few dis-  
contented spirits among those who were removed from the River  
to this Reserve ran away. The number of Indians from the  
best information that I could obtain I set down at three  
thousand within the limits of the Reserve they live in villages  
located on small bottoming up and down the River, the whole  
amount of Cultivable land on this Reserve does not exceed  
fifteen hundred acres, the balance being heavily timbered  
and mountainous valuable only for the timber. I would  
suggest the necessity of having this and also the Mandan  
River Surveyed there has not been a line run on either,  
that I have been able to learn, all that is known, is the  
starting point, the necessity is indeed pressing to prevent collision  
between the Indians and white parties of which men have  
already attempted to occupy the fishing at the mouth of  
the River and were only prevented by the prompt and decided  
interference of Agent Paul, there are three small Islands  
close to the mouth of the River on the best fishing ground -  
To prevent disputes therefore, the starting point should be at  
the mouth and in the middle of the main channel thus

One mile on each side thrown up and parallel with the River twenty miles which would preclude every argument that the Islands did not belong to the Reservation.

Round Valley or Stone Cutt a Reservation of five thousand acres and a Branch of the Sacajawea and was under the direction of the Agent for that Reserve - to which Superintendent Mr Clapp last summer appointed Capt George Ruse principal Farmer under whose judicious management compares favorably with the older and larger Reserves, as for its products it surpasses in quantity any one of them - I cannot speak in terms too high of Capt Ruse for his very efficient direction of this Reserve laboring as he did under many adverse circumstances - The Indians are wholly destitute of Clothing and Blankets - Much sickness prevails amongst them they have no Physician and no medicine there are at this time about One thousand on this Reserve and during this winter many more will be in; there is an abundance of subsistence here, should the Mandan Reserve fall short it may be supplied from thiz, I regret that Mr Gager has not completed the inventory that I might have forwarded a copy showing the exact amount of property and property - the Inventory of this and Stone Cutt ~~was~~ nearly completed as early as the 23<sup>rd</sup> of September, the employees at

From Cutt had presented their respective accounts which I found correct and copied them, those at Norn Lacker have not presented theirs neither has the late Agent Mr. Gager presented his he has also in his possession the copied account of the Norn Cutt employees - on the 24<sup>th</sup> day of September I employed three of the former laborers and on the same day appointed Captain George Rose supervisor, two thousand dollars will suffice to put this Reserve into good condition, Cloth the Indians and furnish many blankets, There is no Grist mill and no threshing machine belonging to this Reserve both being very much needed This and Mandocino Reserves should by all means have a Resident Physician each -

Norn Lacker of which I have already given you an account and have but little more to add the inventory of property and products will make a sorry appearance I fear, on this Reserve in the way of farming fence must be made and an entire new outfit of farming utensils of every description procured - It will require five thousand dollars to put it into good shape for further particulars I refer you to my letter of the 24<sup>th</sup> Sept, There are perhaps five hundred Indians on this Reserve and scarcely produce enough to subsist them and nothing but grain at that I appointed Eugene Howard supervisor on the 21<sup>st</sup> day of Sept,

and two Laborers, I also employed Mr Charles Kyle a well known reliable Citizen to travel with me as guide and, to assist in collecting together the property and to have an eye to the safe keeping of the same; by visiting the Reservoirs at shorter intervals than I alone am able to do, I have no other security as the Department has not fixed the amount of bonds nor the form, for Supervisors to execute, the property of the Reservoirs is therefore in their charge without responsibility, If I am responsible which I presume I am, the Department certainly <sup>must</sup> allow me the means of keeping it safe, for this purpose Mr Kyle is employed, and I will be ready to discharge him as soon as the Supervisor executes Bonds,

For the want of fundz I was unable to make a settlement for the fraction of the last quarter, there is due for compensation as supervisor to John H Smith from 1<sup>st</sup> to 30<sup>th</sup> Sept, to Capt. Russ from 23<sup>rd</sup> to 30<sup>th</sup> Sept, to Eazem Howard from 21<sup>st</sup> to 30<sup>th</sup> Sept, to Lawrence Battail George Bowery and Job Lewis

labouring from 23<sup>rd</sup> to 30<sup>th</sup> Sept, and to Charles Kyle  
from the 1<sup>st</sup> Sept. to the 30<sup>th</sup>, Property Returns I  
had none to make as there was none turned over  
to me in the Quarter ending on the 30<sup>th</sup> September  
expenses I have incurred none except Traveling  
expenses

Very Respectfully  
Your

Obedient Servt,  
J. P. A. Dreiselbig Supr, g Agt,  
of Indian Affairs of Northern  
District of California
