

Senatorial election this year; so you may rest satisfied your course is approved.

O. S. WITHERBY."

SACRAMENTO.—The difficulty between J. W. Park and J. W. McBrayer, of the Assembly, has been adjusted honorably to both parties by mutual friends.

Mr. M'Brayer has introduced a bill into the Assembly, in which several amendments to the city charter are proposed.

EL DORADO.—The *Argus* says the mining claim of Messrs. Wakefield, Campbell and Constantine, located on Oregon Hill, three and a half miles below Coloma, has been worked in all 118 days, and yielded \$3,364 70. The first seventy-nine days of the time, twenty-one of which were spent in cutting a tail race, they took out \$1,764 70. The last thirty-nine days has yielded \$1600, making \$41 per day to the man. The prospects are quite as favorable for months to come. Two years since, this hill was abandoned, it being considered too poor to work.

Cold Springs.—A correspondent writes that mining at this place has received a fresh impulse, and that the rattling of the pick and shovel is heard in every ravine and gulch.

On Sunday last 5,352 ounces of gold dust were bought by the different banking houses in this place, and on the Sunday previous upwards of 4,000 ounces.

SISKIYOU.—New diggings have been struck on the Klamath river between the mouth of Scott's river and Humbug creek—they are reported good and extensive.

The Indians of Shasta, Klamath, Rogue River, and the Lakes, are preparing for a general war, and unless more troops are sent to our assistance, the citizens will be obliged to turn out for the protection of

their own lives and property. We will use every means possible to avoid a general war with these tribes; they are numerous and formidable, being well armed with guns and pistols, are nearly all excellent shots, and in battle will be equal to the whites. The position they have taken is the best in the county, it being a large, spacious cave, surrounded by rocks which will afford them a secure shelter from an attack from either side.

CALAVERAS.—The Calaveras Chronicle contains the following:

CARSON'S FLAT.—Last week Con. O'Leary & Co., took out a piece of solid gold weighing 25 1-2 ounces. They are ground sluicing, and working the same ground where a seven pound piece was taken out by some Mexicans in 1850.

TUOLUMNE.—"Cherokee Bob," "Tom Mitchmer," and another man, an American, have been arrested at Milleston, on the charge of horse stealing. The animals stolen were one horse belonging to Mr. Kellet, and a mule belonging to a Chinaman.—*Columbia Gazette.*

A bank of earth fell on Mr. Dean, at Jacksonville, crushing his leg, and rendering amputation necessary. The leg was taken off by Drs. Bruner and Canton.

BUTTE.—The Plaza claim last week yielded \$800. They are now running two toms, and this week must nearly double that amount, as they have been washing very rich dirt.

The claim at Court House Hill weighed out fifty ounces as the proceeds of their week's labor.—*Butte Record.*

TURKISH LITERATURE.—It is stated by a reliable writer, Dr. Michelson, that there are 84 newspapers published in the
