

A revolutionary movement has taken place at Bogota. It created little excitement.

A Russian Prince in a Fix.—Captain Whiting of the Sonora reports that when at Rio Janerio from 2d to 8th April, there was a Russian prince with his yacht in harbor and the English Admiral of the station would not permit him to leave the port. On two or three occasions when the yacht got under way, the British steamer immediately got up her steam and took position outside the harbor to prevent her getting out.

San Francisco, May 31st.

A fire commenced at 3 o'clock, this morning on Dupont st. between Broadway and Vallejo, burning about 30 wooden buildings, surrounding the county jail.—The jail being brick escaped.

SNAKE BITE.—Mr. Thos. Turner, of Moore's Flat, on Friday last while attempting to handle a rattlesnake, was bitten on the hand, between the bones of the thumb and forefinger. His hand and arm swelled to an immense size in a few moments, and it was thought he could live but a very short time. We have since learned, however, that although the swelling had extended into his body, he is yet alive, and there is hope of his recovery.

A Packer Shot by an Indian.—The Shasta Courier says that Miron Scribner was shot on Monday, on the road from Reading's Creek to the South Fork of Trin-

ity river. He was struck under the left shoulder blade. The force of the ball, however, was considerably spent before striking, and did not therefore, it is hoped, inflict a mortal wound. In consequence of this affair all the Indians of that vicinity have broke for the mountains.

The Races.—The race came off at the Union race course on Saturday last as advertised.—The purse \$35.

Mr. Lobdell named his c. g. Henry Clay.

Mr Jones named his g. m. Mary Miller.

First heat, Mary Miller came out 18 feet ahead ; Clay carrying a rider weighing 17 pounds. Second heat, Mary Miller won by 5 inches ; Henry Clay, carrying a rider of 130 lbs.

Considerable of interest was manifested, and a good deal of betting on the two animals.—The friends of each, we believe, still have every confidence in their favorites, and would back them as readily as ever.

A few scrub races were afterwards run, and people generally left well satisfied.

Fire.—As the dry season is now approaching, it would be well for the inhabitants of our town to be on the watch for fires. Although we are not aware that any of those fiends in human shape, incendiaries, are prowling about our town, it should be remembered that a fire originating from unforeseen accidents or carelessness are equally destructive, and in our
